

Nothing in this
world is as certain
as change.

————— ” —————

particip
your partner in change

Guiding change is central to what we do at Particip.

We support transformation processes through people-centered consultancy, grounded in the principle of participation.

While technical expertise plays a key role, we believe that sustainable development depends on engaging those at the heart of change:

The people themselves.

Clients

We work for the European Commission, EEAS, UN agencies, the World Bank, regional development banks, national governments, and bilateral development organizations including GIZ, KfW, Danida, the Ministries of Foreign Affairs of Finland and the Netherlands, Norad, SDC, and Enabel.

Facts & Figures

- 1 Staff & Consultants**
We employ a multicultural team of over 95 staff at our offices, and work with more than 1,400 expert consultants globally.
- 2 Global Presence**
We maintain a strong global presence with a wide network of partners and over 50 dedicated project offices around the world.
- 3 Affiliated Companies**
Our affiliated entities include CAPA EEIG, InProVE EEIG, ELMEN EEIG, and SQuaRE by MEL EEIG, active across various sectors.
- 4 International Branches**
Particip operates international branches in Belgium, Afghanistan, and Ukraine, contributing local insight and support to our global operations.

Geographic Coverage & Key Areas

Since 1989, Particip has implemented over 1,800 projects in more than 150 countries, delivering expert services across a wide range of sectors. Our long-standing international experience is built on strong capabilities in the development and application of project management, monitoring, and evaluation methods.

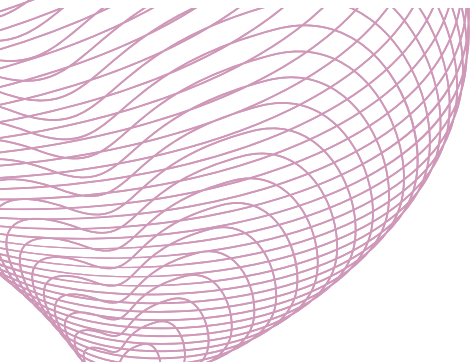

We work in close cooperation with numerous European firms and a large network of partner institutions worldwide. Local participation is central to our approach, ensuring that our projects are context-specific, and sustainable.

Guided by results-based management and the 17 Sustainable Development Goals, our inter- and multidisciplinary teams support the full project cycle.

Our services are multi-dimensional and organized along two perspectives:
A **thematic and sectoral**, and a **cross-cutting** perspective.

Our Approach

Sustainable development requires a people-oriented, participatory approach to management and consultancy. Technical inputs are only one important component to facilitate development.

One of our strengths lies in coordinating multi-disciplinary and multinational teams to achieve synergy effects.

Our strong networking capacities, our reliable management system, toolboxes and our financial strength and independency reinforce the backbone of our services.

Our Services

Client orientation and the effective management of change lie at the core of our work.

We continuously refine our services based on in-depth analysis of client needs and market trends.

Our tailored solutions address critical global challenges - ending poverty, promoting peace, combating inequality, and responding to climate change.

AGRICULTURE, FOOD AND NATURAL RESOURCES

- Poverty reduction and livelihoods
- Community development and local self-organisation
- Agriculture, irrigation and livestock
- Food security
- Fishery and aquaculture
- Forestry
- Land management and territorial development
